

Gobi CLI Cheatsheet v2.0.11

Spaces · Global · Vault · Saved · Sessions · Media

INSTALL `brew tap gobi-ai/tap && brew install gobi`
`npm i -g @gobi-ai/cli`
SETUP `gobi auth login → gobi vault init → gobi space warp`

AUTH & SETUP login, vault, space

- `auth login · auth status · auth logout`
- `vault init` · interactive vault selection, writes `.gobi/settings.yaml` + `PUBLISH.md`
- `vault list` · list vaults you own

SPACE posts in a space

- `space list · space warp [slug]`
- `space create-post --title --content [--auto-attachments --vault-slug --draft-id]`
- `space create-reply <id> --content [--auto-attachments --vault-slug]`
- `space feed · list-posts · get-post <id> [--full]`
- `space list-topics · list-topic-posts <slug>`

VAULT publish & sync

- `vault publish` · upload `PUBLISH.md` to webdrive
- `vault status` · show publish state & profile URL · `unpublish`
- `vault sync [--dry-run] [--full] [--path]`
- `vault sync --conflict ask|server|client|skip`
- `vault sync --upload-only | --download-only`

GLOBAL posts in your vault & public feed

- `global feed [--limit --cursor --following]`
- `global create-post --title --content [--auto-attachments --vault-slug --draft-id]`
- `global create-reply <id> --content [--auto-attachments --vault-slug]`
- `global list-posts [--mine --vault-slug] · get-post [--full]`
- `global edit-post / delete-post <id>`

SAVED notes & bookmarked posts

- `saved create-note --content [--timezone]`
- `saved list-notes [--date YYYY-MM-DD] [--limit]`
- `saved get-note / edit-note / delete-note <id>`
- `saved create-post --source <id>` · bookmarks an existing post
- `saved list-posts [--type all|article|space-post] · get-post / delete-post <id>`

SESSION chat with agent on vault knowledge

- `session list [--limit]`
- `session get <id> [--limit --cursor]`
- `session create-reply <id> --content`

SENSE activity & transcripts

- `sense list-activities --start-time --end-time`
- `sense list-transcriptions --start-time --end-time`
- times are ISO 8601 UTC

DRAFT agent-suggested actions

- `draft list [--limit] · get <id>`
- `draft add <title> <content> [--action --session]`
- `draft action <id> <idx> · prioritize <id> <n>`
- `draft revise <id> <comment> [--title --content --action]`
- `draft delete <id>`

MEDIA — IMAGE

- `media generate-image --prompt --aspect-ratio --wait -o`
- `media edit-image --prompt --image (img2img)`
- `media inpaint-image --prompt --image --mask`
- `media get-image-status / download-image <jobId>`

MEDIA — VIDEO & AVATAR

- `media create-cinematic --prompt --wait -o`
- `media create-video --avatar-id --voice-id --script --wait -o`
- `media design-avatar-from-selfie --photo [--prompt]`
- `media design-avatar / confirm-avatar`
- `media list-avatars · list-voices · upload <file>`

COMMON WORKFLOWS

Share gobi space `create-post --title "..." --content "..." --auto-attachments`
Public gobi global `create-post --title "..." --content "..." --auto-attachments`
Sync gobi vault `sync --conflict client`

github.com/gobi-ai/gobi-cli
global: `--json · -h · -V · gobi update`
