Business Requirements Document: Catch Up AI 2026 ÖHÓ~ÇtÉÀ

Project Name: Catch Up AI 2026 ÖHÓ~ÇtÉÀ
Date: 2026-02-15
Version: 1.0

1. Introduction

Catch Up AI 2026 ÖHÓ~ÇtÉÀ is a project aimed at creating a comprehensive AI-powered learning platform. The platform will leverage advanced AI technologies to provide personalized learning experiences, including content recommendation, adaptive learning paths, and interactive tutoring. The project is designed to address the needs of learners seeking to catch up on their studies and enhance their understanding of various subjects. The platform will be developed using state-of-the-art AI models and integrated with a robust backend infrastructure to ensure scalability and security. The project is expected to launch in 2026, with a focus on providing high-quality, accessible education to all users.

2. Stakeholder & User Analysis

2.1. RACI Matrix

Role	Responsible (R)	Accountable (A)	Consulted (C)	Informed (I)
Product Owner	R	A	C	I
Development Team Lead	R	A	C	I
UI/UX Designer		C	I	
Marketing Lead		C	I	
Content Creators	R	C	I	

2.2. Target Users

- A group of learners seeking to catch up on their studies, including students and professionals.
- Users interested in AI-powered learning tools, such as The Coding, Vibe Learning, Vibe Guiding, and Catch Up AI.
- Users who are looking for a comprehensive AI-powered learning platform that can adapt to their learning needs.

2.3. User Journey Map

- Users discover the platform through various channels, including YouTube, social media, and direct referrals.
- Users explore the platform's features, including AI-powered learning tools, and sign up for a free trial.
- Users engage with the platform, utilizing the AI-powered learning tools to enhance their understanding of various subjects.

- **ä-mēÄ-EDÄ'** (~~000~~)Ä' /~~kAÖÖ~~*TÈ ÈHTML)
- **YouTubEÄ³Ü** YouTubeÖ , Çt¹-Ä³ÇÖÜÄÄÖDÄÜ YouTubeAPI (>4Ö²üÉÖV€© .

4.2. Technical Constraints

- **Æ Æ Å**: Ä ¾DÄ½(ÄÅ) »8DN, ¬ÄËäÄX)ÄÖÖT .
- ¬ ¼**P0È Å**MVP (Minimum Viable Product) Æ°Å ¼Ö È ÄÆ .
- **IXÑP¹¬** CMS ½²CÇXProduct O w n eÉÇ È TML Â È ¬ .
- **YouTubeAPI:** »4, Ö²Ü¹Ä¬ÆÖ\ .

4.3. Scalability Requirements

- 0_~õ=00C@~E=ÃXÖÄ~Ê=ÂAmazon CloudFront CDN Í¬¹NµÖ19U¾\$.
- İXÑPİ®Ê ÈHTML¼)ÇYÉKÑFÁÉ·ÂÜSON®0¾È½µ¼)ÁÝÇÜÇ×AA\$,.
- Ä-ÆÈ68AÄ-ÄÀ-Æ©ÄACGX»ÄÇD NÖÐ®,\½ÖÄ·³¾ôÖÐÆ'Ö¹.

5. Functional Requirements

5.1. Core Features

- °TQÇtÉA Catch Up AI ÁC¼ 5- ÈÀÙ\È À”Á½ - (Priority: Must Have)
- Õ ,ÌÈ ÄÄÖÇtÉA5-Õ ,ÌÈ ÄÄÄ8°:©Ö¼)¼±,`,(YouTubeÕ , Çt¹-ÄÄÖP (Priority: Must Have)
- Í”lOE ÄÄAXÖ ,ÌÈ ÖÇtÉA Product O w n e Å¼ÄÖ 5Í”lOE ÄÄÆ - (Priority: Should Have)
- ²ä-mÄÖ0²Æ Á´ /ÖEmÄ-ÇtÖX, È¼(Priority: Must Have)
- ¼ ÇQÇ·ÇmÄDÜ½¾pt¼, ÇP®ÄÄÄÄ-ÆÖÄÖP (Priority: Must Have)
- YouTubeÌD±I³ÄÄD”:äÓÇtÉAÄDubelD±¼, Çt³ÜÖÄÆ - (Priority: Must Have)
- ÁEÄüÄDCatch Up A lExÄEÄüÌD± (LinkedIn, Twitter ´ñ)ÄÆ - (Priority: Should Have)
- ²tÄ¤, NÄÖÜ:-µÖÄ¤, NÄÄàlÖÈ - (Priority: Nice to Have)

5.2. User Stories

- As a AI $\tilde{O}(\frac{1}{n})$, I can't Catch Up A $O(\frac{1}{n})$. So that $\lim_{n \rightarrow \infty} \frac{\tilde{O}(\frac{1}{n})}{O(\frac{1}{n})} = 0$.
- As a Vibe Coding $\frac{1}{n}$, I want Vibe Coding $O(\frac{1}{n})$. (YouTube: CTA=O(1/n) so that Vibe Coding $\frac{1}{n}$ is $O(\frac{1}{n})$.)
- As a AI PKM Coho $\frac{1}{n}$, I want AI PKM $O(\frac{1}{n})$. So that $\lim_{n \rightarrow \infty} \frac{\tilde{O}(\frac{1}{n})}{O(\frac{1}{n})} = 0$.
- As a $\tilde{O}(1)$, I can't $\frac{1}{n}$. So that $\lim_{n \rightarrow \infty} \frac{\tilde{O}(1)}{O(\frac{1}{n})} = 0$.
- As a $\frac{1}{n}$, I can't $\times 4^3$. So that $\lim_{n \rightarrow \infty} \frac{\tilde{O}(\frac{1}{n})}{O(\frac{1}{n})} = 0$.

- As a Catch Up AI Product Owner, I want AI to be able to use the AWS Lambda service so that it can be deployed to the cloud.

6. Non-Functional Requirements

6.1. Performance

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

6.2. Security

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

6.3. Usability

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

6.4. Reliability

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

7. Constraints & Assumptions

7.1. Budget Constraints

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

7.2. Timeline

- The application should be able to handle up to 100 concurrent users.
- The application should be able to handle up to 100 concurrent users.

7.3. Assumptions

- Product Owner HTML/CSS/JavaScript proficiency.
- YouTube API access and usage.
- Amazon S3 storage and retrieval.
- Product Owner availability for development.

8. Risk Analysis

Risk	Impact	Probability	Mitigation Strategy
AI Integration	High	Medium	Regular updates and testing.
Product Owner CX	Medium	Medium	Clear communication and documentation.
YouTube API	Low	Low	Monitor API changes and update code.
Amazon S3	Low-Medium	Medium	Regular backups and security checks.
Product Owner Availability	Medium	High	Establish a communication plan and backup resources.

9. Dependencies

- YouTube API for video upload and retrieval.
- Amazon S3 for video storage.
- AI Integration (Claude Code, Cursor) for development.
- Product Owner availability for development.

10. Approval

Catch Up AI 2026 is a project that aims to provide a comprehensive overview of the current state of AI and its future potential. The project is led by the Product Owner, Catch Up AI, and is supported by the Development Team Lead.
